SUMMARY

A pro-active web interface developer with 2+ years of experience in IT industry, with expertise in developing highly responsive and robust Web Applications, which work seamlessly across all devices. Passionate about learning new development and design technologies.

EDUCATION

UNSW Sydney, Australia (July 2018 – Expected May 2020)

Master of Science (Information Technology, major: E-commerce)

R.V. College of Engineering, Bangalore (Aug 2012 – May 2016)

Bachelor of Engineering

EMPLOYMENT HISTORY

Accenture, India

Web Applications Engineer (Nov 2017-Jul 2018)

- Develop, debug, analyze and re-structure/refactor existing code to deliver optimal performance of web applications.
- Configuration of auto deployment channel of code on production environment (single-click deployment).
- End-to-end implementation of cutting-edge web-technologies and developing proof of concept for the same.
- Conduct technical presentations at the end of each sprint to inform product owners/stakeholders about newly added features.

International experience

- Working overseas (Frankfurt,Germany) in an Agile project model with multicultural/diverse teams to deliver effective technical solutions directly at the client-site.

- End-to-end implementation of front-end technologies to develop an e-commerce banking portal, for one of the leading banks in Germany.
- Acquired global awareness through immersion in German culture.

User Interface Developer-Associate (May 2016-Nov 2017)

- Development of Single Page Web Application using JavaScript frameworks- AngularJS and ReactJS.
- Suggesting alternative design solutions for enhancing user experience of product.
- Delivering technical presentations about technologies used in product.
- Enhancing Web Applications with features such as cross-browser usage and responsiveness (to enable usage across devices of varying screen sizes)

SKILLS

- Python, JavaScript, HTML and CSS
- JavaScript Frameworks-Angular 2+ and ReactJS
- Digital Content creation/editing using Photoshop
- Web Applications prototyping with AxureRP Tool.
- Development Operation tools – TeamCity, Bitbucket and GitHub
